DETAILED ACTION

Response to Amendment

1. Applicant's request to enter the After-Final Amendment, filed 2/26/2004, upon Appeal, has been acknowledged. The result of amendment cancels claims 9-15 and amends Claim 3, in a non-limiting manner. Hence, Claims 1-8 are pending.

Allowable Subject Matter

2. Claims 1-8 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Although the prior art of record clearly shows manually operated tamping machines are known to have crank mechanisms comprising vertically reciprocating structural elements, such as connecting rods, piston pins, guide pistons and piston guides, which are made of steel or other dense metals.

Even though Darda '309 teaches making a fixed tubular housing from aluminum; neither Linz '735, nor Darda '309 teach or suggest making any of the vertically reciprocating structural elements from a material less dense than steel, As argued by the Applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
